Dear Hiring Manager,

I am writing to express my interest in Technical Support Representative, IT Support Specialist, Help Desk Analyst, Service Desk Analyst, and related customer-facing technology roles.

With more than five years of experience providing bilingual technical support, I have developed strong troubleshooting, communication, documentation, and customer reassurance skills. While supporting Videotron customers through XCM / ITCM Sourcing from December 2020 to June 2026, I assisted users with internet connectivity, Wi-Fi, modem and router configuration, telephony services, account issues, and service-related questions.

In that role, I diagnosed technical issues, documented cases using CRM and ticketing workflows, guided non-technical users through step-by-step resolutions, and escalated complex incidents when needed. Working daily in French and English helped me communicate clearly with diverse customers while maintaining quality and customer satisfaction expectations.

In addition to my support background, I hold a Bachelor's Degree in Management Information Systems and continue to strengthen my technical knowledge through practical projects. My foundation includes Microsoft 365, Windows user support, networking fundamentals, VPN and DNS basics, web development, SQL databases, APIs, Git, GitHub, Vercel, Supabase, and n8n automation.

I am currently based in Campbell River, British Columbia, on an employer-specific Canadian work permit. For a new employer outside Quebec, the LMIA-exempt Francophone Mobility/C16 pathway may be an option, and I would be happy to discuss a compliant start plan.

I would welcome the opportunity to interview and explain how my bilingual communication skills, technical support experience, and practical web/automation background can help your team support users effectively once the required work authorization path is arranged.

Sincerely,
Papa Amadou FALL
