---

Dear Hiring Manager,

I am applying for IT Support, Help Desk, Service Desk and Technical Support roles where bilingual communication, structured troubleshooting and strong customer service are essential. With more than five years of frontline technical support experience in a telecommunications environment, I can help users resolve technical problems clearly, calmly and efficiently.

During my work supporting Videotron customers through XCM / ITCM Sourcing from December 2020 to June 2026, I assisted users with internet connectivity, Wi-Fi, modem and router configuration, mobile, telephony, account and service-related issues. I diagnosed problems remotely, guided non-technical users through step-by-step solutions, documented cases in CRM and ticketing workflows, and escalated complex incidents with clear troubleshooting notes.

My technical foundation includes Microsoft 365, Outlook, Teams, Windows user support, macOS, networking fundamentals, TCP/IP, DNS, VPN, Wi-Fi, modem/router troubleshooting, Remote Desktop, ticketing systems and CRM tools. In addition, my web development and automation background - JavaScript, TypeScript, React, Next.js, PHP, Python, MySQL, REST APIs, Git/GitHub, Vercel, Supabase and n8n - helps me understand systems, workflows and user issues beyond surface-level troubleshooting.

Legally authorized to work in Canada with an employer-specific LMIA-exempt work permit under the Francophone Mobility Program. Eligible to change employers through the Francophone Mobility Program.

I would welcome the opportunity to discuss how my French/English communication skills, technical support experience and practical technology background can help your team support users effectively and professionally.

Sincerely,

Papa Amadou FALL
