Dear Hiring Manager,

I am applying for IT Support, Help Desk, Service Desk and Technical Support opportunities where bilingual communication, structured troubleshooting and strong customer service are essential. With more than five years of frontline technical support experience at XCM Sourcing on the Videotron project, I can help users resolve technical problems clearly, calmly and efficiently.

In this role, I supported Videotron customers with internet connectivity, Wi-Fi, modem and router configuration, mobile devices, telephony, account access and service-related issues. I diagnosed problems remotely, guided non-technical users through step-by-step solutions in French and English, documented cases in CRM and ticketing workflows, and escalated complex incidents with complete troubleshooting notes.

My technical foundation includes Microsoft 365, Outlook, Teams, OneDrive, SharePoint, Windows 10/11, macOS, Android/iOS, Active Directory and Microsoft Entra ID fundamentals, TCP/IP, DNS, VPN, Wi-Fi, modem/router troubleshooting and Remote Desktop. My additional experience with web development and automation - including JavaScript, TypeScript, PHP, Python, MySQL, REST APIs, Git/GitHub, Supabase and n8n - strengthens my systems thinking, problem-solving and ability to learn new tools quickly.

Since relocating to British Columbia, I have continued building Canadian workplace experience at Tim Hortons while actively pursuing a long-term return to the IT support field. I am known for patience, professional communication, accurate documentation, customer de-escalation and a practical approach to resolving technical issues.

I am legally authorized to work in Canada with a valid employer-specific LMIA-exempt work permit under the Francophone Mobility Program and am eligible to change employers through the required LMIA-exempt process. I am also open to relocation for the right IT support opportunity.

I would welcome the opportunity to discuss how my bilingual communication skills, technical support experience and practical technology background can help your team deliver reliable and professional support.

Sincerely,

Papa Amadou Fall
