Dear Hiring Manager,

I am writing to express my strong interest in Technical Support Representative, Help Desk Analyst, Service Desk Analyst, or bilingual SaaS support opportunities within your organization.

With more than five years of experience providing customer-facing technical support, I have developed strong troubleshooting, communication, and problem-solving skills. While supporting Videotron customers through XCM Sourcing from December 2020 to June 2026, I assisted users with internet connectivity, Wi-Fi networks, modem and router configuration, telephony services, device issues, and account-related inquiries.

In this role, I diagnosed technical issues, documented cases using CRM and ticketing systems, guided non-technical users through step-by-step resolutions, and escalated complex incidents to higher support tiers when necessary. Working daily in both French and English strengthened my ability to communicate clearly with diverse customers while maintaining quality and customer satisfaction objectives.

In addition to my professional experience, I hold a Bachelor's Degree in Management Information Systems from Université de Thies and continue to expand my technical knowledge through cloud, web, API, and automation projects. My technical foundation includes Microsoft 365, Windows environments, networking fundamentals, VPN connectivity, DNS, Active Directory basics, JavaScript, TypeScript, React, Next.js, MySQL, and remote support practices.

I am currently based in Campbell River, British Columbia, on an employer-specific Canadian work permit. Before starting with a new employer, I would need a new employer-specific work permit or written IRCC authorization. As a French-speaking candidate seeking work outside Quebec, I may be eligible for the LMIA-exempt Francophone Mobility/C16 pathway if the role and employer qualify.

I would welcome the opportunity to interview now and discuss a compliant start plan. My bilingual communication skills, customer service experience, technical support background, and practical web support knowledge would allow me to contribute strongly once the required work authorization is in place.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my skills and experience can contribute to your organization's success.

Sincerely,

Papa Amadou FALL
